

Match each statement with its probability.

- A. You will be struck by lightning tomorrow. ~~Impossible~~
- B. You will be younger tomorrow than you are today. ~~Unlikely~~
- C. If you roll an ordinary dice you will get a number smaller than 7. ~~Evens~~
- D. You will watch television sometime this week. ~~Likely~~
- E. If you flip a coin you will get heads. ~~Certain~~
- 

Note: D is an especially good one to start a conversation about probability as different people watch different amounts of television. The answer does not have to be 'likely', but shouldn't be 'impossible' or 'certain'.
