Writing formulae

Write down an algebraic formula for these rules. Use the underlined letters and numbers.

a. The total raised in a sponsored run at £2 a mile.

$$t = 2m$$

b. The \underline{t} otal length of a $\underline{4}$ m car with a \underline{b} oat trailer.

$$t = 4 + b$$
 or $t = b + 4$

c. The \underline{h} eight of a $\underline{6}$ ft post after a \underline{p} iece has been cut off.

$$h = 6 - p$$

d. The <u>a</u>mount each person receives when <u>4</u> friends share a <u>prize</u> equally.

$$a = p/4$$

e. The total cost of some bags of sweets at p pence a bag.

f. The <u>n</u>umber in a form when the <u>p</u>upils in year 7 are divided into \underline{f} forms.

$$n = p/f$$

g. The <u>length</u> remaining in a <u>b</u>all of string when a <u>p</u>iece is cut off.

$$l = b - p$$

h. The total length of a building plot for a house and a garden.

$$t = h + g$$
 or $t = g + h$
